

*10th* ANNUAL BULL AND FEMALE SALE

# TA CATTLE

DECEMBER 16, 2022 | 1:00 PM | WEST POINT, NEBRASKA

RED ANGUS | ANGUS | CHAROLAIS | SIMANGUS

**YOUR ONE STOP BULL SHOP**

# Welcome -

Welcome to our 10th annual sale! We would like to express our sincerest thanks to our many loyal customers, family, and friends who have helped get us to where we are today. Your interest in our cattle and belief in our program is greatly appreciated!

There are two things that I have learned in the cattle business: 1) There are always new ways to be better and 2) There will be a surprise around every corner, but we think that using TA Cattle bulls will decrease the number of surprises! So we are trying something new with having a December sale and we have a surprise for you—we are selling bred heifers on the sale for the first time. These heifers will be no different than the open heifers that we have sold in the past, we've just done a little bit more of the work for you.

Here at TA Cattle, we strive to bring you our very best, so that your program can become more profitable. The quality that is represented here comes with great sacrifice; a lot of our bull calves will never get to see sale day. At TA Cattle we have a "no excuses" strategy that starts at birth and goes all the way through to our end product. We have worked very hard to select cattle that are a multifunctional genetic package. This has been difficult because so many cattle today are so terminal—with the focus being on growth and carcass traits, while important things like fertility and many others are being overlooked.

One thing that you will already know from visiting with us is that it starts with a good cow, without that you have nothing. We only have a 45-day calving period and are not making excuses for our cows. We believe in making our cows work for us instead of us working for our cows. These bulls are not pushed, they are raised on grass and fed very low MCAL rations to assure that libido and longevity are not sacrificed. With that being said, I hope you will feel confident that the cattle you see here will hold up for you. The feedback that we have gotten from our customers has been great. We are always listening and looking for ways to make our cattle better.

Looking forward to seeing you in West Point on December 16!

**ANNOUNCEMENTS**

Announcements from the block take precedence over the information in this catalog.

**CATTLE VIEWING**

Cattle can be viewed online at DV Auction.com or if you would like to view them in person, call Travis to arrange a time.

**ONLINE BIDDING**

The sale will be broadcast live. Visit DV Auction.com a few days before the sale to sign up for online bidding.

**RETAINED INTEREST**

We are retaining half interest in all bulls in the sale. We are selling the remaining half interest, full possession, and full salvage value. This option gives TA Cattle the option to collect, use, and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of TA Cattle, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, TA Cattle interest then becomes in herd use only, but TA Cattle retains all rights to use the bull within their herd.

**GUARANTEE**

All bulls selling for \$3,500 or more are guaranteed for the first breeding season. A breeding season is defined as the 90 day period following the first turnout of the bull. If a replacement bull is available, he will be provided or if the buyer prefers, credit toward one bull will be given in the following sale, less salvage value of the injured bull. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage.

**VACCINATION RECORD**

All cattle have been vaccinated, starting at 30 days of age, at grass turnout, and again at pre-weaning and post-weaning. They were poured and dewormed. Vaccinations include 7-way clostridial, IBR, BVD, P13, BRSV, haemophilus somnus, and pasturellas. Any positive test results will be noted with EPDs throughout the catalog. The open heifers have also been Bangs vaccinated. The bulls and heifers have had their pre-breeding shot—Express FP 5-VL5. If you would like specific details on products used please give us a call. The bulls will be sold as guaranteed breeders according to the sale terms and conditions of the RAAA. Load out can be done anytime during the sale after settlement.

**DELIVERY**

Free delivery up to 300 miles. Any bulls remaining will be hauled back to TA Cattle's feedlot and boarded free of charge until February 1. After that there will be a \$4.00/hd/day feed charge until they are picked up or delivered. If you would like TA Cattle to feed and breed the open heifers, let us know right after the sale so arrangements can be made. If you do not need our services, then heifers must be picked up sale day or the couple days following at West Point Livestock.

# ATA CATTLE

*Annual Bull and Female Sale*

# 150 REPLACEMENT HEIFERS

Moderate group of heifers that are going to make fantastic momma cows. I don't think a guy could go wrong with any of these. All proven herd sires that bring great mothering ability, udder suspension, and teat size. These are the kind that will stay in the herd for years and pay for themselves quickly.

*Ready to breed whenever it suits your operation!*  
**Multimin 90 - Pre Breeding - Tract Scored - Guaranteed Open**

**Red Angus**  
 Sired by TA Bulls & purchased from Scott Bousquet

# PREMIUM CALF VALUE

*Easy as 1-2-3*

## Want MORE for your steers?

THAT'S EASY ...

1. Purchase Top Dollar Angus-qualified bulls.
2. Raise Top Dollar Angus-qualified feeder calves.
3. Pocket MORE per head!

### THE RESULTS:

Better performance and a documented \$84.26-per-head advantage as fed cattle!  
The **PROOF** is in your bank account.

Steers & Heifers	Top Dollar Angus Qualified	Non-Qualified	Difference
Head Count	1,801	4,448	
Percentage of Head Count	29%	71%	
Average Daily Gain	4.28	3.99	0.29
Hot Carcass Weight	935	888	47
Marbling	504	471	33
Ribeye Area	15.4	15.2	0.2
Fat Thickness	0.66	0.61	0.05
<b>Value Per Head</b>	<b>\$1,626.13</b>	<b>\$1,541.86</b>	<b>\$84.26</b>

Top Dollar Angus has the necessary resources to provide third-party genetic verification of high-quality Angus and Red Angus-influenced feeder calves and females. Combining genetic verification with our extensive network of seedstock partners and feedyards allows Top Dollar Angus to deliver the unique ability of marketing assistance to our customers and truly connect people to people and people to profit.

Source: Neogen field study representing five feed yards and 6,249 head.

Insight goes back to the same great dam as Bieber Rolling Deep Y118 and sired by one of the most sought-after heifer bulls in the breed. His pedigree is very intriguing to make females. Our Insight females we retained to breed are some of our favorites. Look at lot 92 to see what to expect. They are very soft made and easy fleshing.

Reference Sire **9 MILE ENTERPRISE 8180**

**LOTS 7-8**

Enterprise is another Franchise son that we sampled. The maternal pedigree is there with great end point data. We have followed the 9 Mile program through the years. He had a great eye for cattle that had both a maternal and terminal goal in mind. The 9 Mile herd prefix is and will be used for many years to come and has had a great impact on our herd.

LOTS 9-13

Leverage is a bull we purchased from C-Bar Red Angus. He has a terminal EPD profile that is hard to get around, going back to the great Stony cow. If you have a set of softer made cows that need a shot of frame and shape, these sons should be on your short list.

**LOTS 14-15**

Full flush brothers that are flat good. 191 is a true asset to our program. She has 19 females in production, mating well with any sire that you throw at her. Then add Hard Drive Y120 on top of that with his carcass and maternal traits. The heifers and steers will both be worth a big premium.

LOTS 16-18

As cow number decline with the drought we are experiencing, a person needs to think about making replacement females to build numbers back in the coming years. These Great Basin bulls are at the top of the list when thinking about what makes a female profitable. Low maintenance, low input, highly fertile, and stay in the herd. Backed by some of our favorite cow families, Verna, Cheyenne, and Princess Anne.

Likeable is a bull that we plan to use more of in the coming years. Going back to the same Isabel cow family as Y69. He is perfect structured with a flawless set of feet and legs. Always in good flesh being a 5.2 frame bull. Lot 48 throws more fuel to the fire by bringing OCC Juanada and Barstow Cash into the equation. Female maker here that will make females that last.

# Charolais Hybrid Bulls

SPRING 2021 BORN

## LOTS 52-56

These Butterscotch bulls are very impressive. Send them out on a group of red cows for quarter blood feeders that will crush the scales.

Reference Sire **LT AUTHORITY 7229 PLD**

# The Females

This will be the first year we have ever offered purebred females for sale. They are straight out of the keeper pen. They have the look to be show heifers and the pedigree to be profitable cows.

89

# RED ANGUS GUIDE TO EPDS

**HB ..... HerdBuilder Index** – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

**GM ..... GridMaster Index** – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

**CED ..... Calving Ease Direct** – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**BW ..... Birth Weight** – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**WW ..... Weaning Weight and YW ..... Yearling Weight** – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

**Milk ..... Milk** – Predicts differences in weaning weight of daughter's progeny due to milk production.

**ME ..... Maintenance Energy** – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**HPG ..... Heifer Pregnancy** – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**CEM ..... Calving Ease Maternal** – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**STAY ..... Stayability** – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**MARB ..... Marbling Score** – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

**YG ..... Yield Grade** – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on gridmarketed progeny.

**CW ..... Carcass Weight** – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**REA ..... Rib Eye Area** – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**BF ..... Backfat** – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

# SIMMENTAL GUIDE TO EPDS

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Birth Weight (BW):** Pounds of birth weight.

**Weaning Weight (WW):** Pounds of weaning weight.

**Yearling Weight (YW):** Pounds of yearling weight.

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.

**Milk (MLK):** Pounds of weaning weight due to milk.

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.

**\$Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

- **All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- **Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ( $\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$ ). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

**Yield Grade (YG):** Yield grade score.

**Carcass Weight (CW):** Pounds of carcass weight.

**Marbling (MRB):** Marbling score. Back Fat (BF): Inches of backfat.

**Ribeye Area (REA):** Square inches of ribeye.

**All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario (See below for more details.)

# Protect What You've Spent A Lifetime Raising

## Livestock Risk Protection (LRP)

LRP allows cattle producers to protect against declining market prices, providing you peace of mind that your livestock is covered if prices fall.

## Pasture, Rangeland & Forage (PRF)

A lack of rainfall could be devastating to ranchers and hay producers. PRF insures between 70-90% of normal precipitation by using data to estimate historical rain.

## Health Care Coverage

Our plans are available in all 50 states and are packed with the value and benefits you deserve, such as enhanced ambulance coverage.

To learn more or connect with an agent, please visit  
**FBN.com/Insurance** or call **(877) 204-4645**

We are an Equal Opportunity Provider. FBN Crop Insurance services are offered by FBN Insurance LLC (dba FBN Insurance Solutions Services LLC in Texas, and FBN Insurance Solutions LLC in California and Michigan) and are only available where FBN Insurance LLC is licensed. FBN membership is not required to purchase through FBN Insurance LLC, but certain features are only available to FBN members. FBN Crop Insurance is currently offered in the following states: AL, AR, AZ, CA, CO, FL, GA, IA, ID, IL, IN, KS, KY, LA, MI, MN, MO, MS, MT, NC, ND, NE, NM, NV, NY, OH, OK, OR, PA, SC, SD, TN, TX, UT, VA, WA, WI, WV, WY.
